D.3	Key risks regarding the Notes	<p>Investors should note that the Notes (including Notes which are expressed to redeem at par) are subject to the credit risk of [CGMFL and CGML][Citigroup Inc.][CGMHI and Citigroup Inc.]. Furthermore, the Notes may be sold, redeemed or repaid early, and if so, the price for which a Note may be sold, redeemed or repaid early may be less than the investor's initial investment. [There are other certain factors which are material for the purpose of assessing the risks associated with investing in any issue of Notes, which include, without limitation (in each case, where applicable), (i) risk of disruption to valuations, (ii) adjustment to the conditions, substitution of the relevant underlying(s) and/or early redemption following an adjustment event or an illegality, (iii) postponement of interest payments and/or minimum and/or maximum limits imposed on interest rates, (iv) cancellation or scaling back of public offers or the issue date being deferred, (v) hedging activities of the Issuer and/or any of its affiliates, (vi) conflicts of interest between the Issuer and/or any of its affiliates and holders of Notes, (vii) modification of the terms and conditions of Notes by majority votes binding all holders, (viii) discretions of the Issuer and Calculation Agent being exercised in a manner that affects the value of the Notes or results in early redemption, (ix) change in law, (x) illiquidity of denominations consisting of integral multiples, (xi) payments being subject to withholding or other taxes, (xii) fees and commissions not being taken into account when determining secondary market prices of Notes, (xiii) there being no secondary market, (xiv) exchange rate risk, (xv) market value of Notes being affected by various factors independent of the creditworthiness of [CGMFL and CGML][Citigroup Inc.][CGMHI and Citigroup Inc.] such as market conditions, interest and exchange rates and macroeconomic and political conditions and (xvi) credit ratings not reflecting all risks.]</p> <p>[The ability of the Issuer to convert the interest rate on Notes from one interest basis to another will affect the secondary market value of such Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing and to a rate which is lower than other comparable notes (as applicable).]</p>

SCHEDULE 2

GENERAL CONDITIONS OF THE NOTES

1. Condition 5(d)(iii) (*Redemption and Purchase – Early Redemption Amount*) shall be amended by the deletion of the definition of "y" and the substitution of the following therefor:

"y" is the Day Count Fraction specified in the applicable Issue Terms which will be either (i) 30/360 (in which case the numerator will be equal to the number of days (calculated on the basis of a 360 day year consisting of 12 months of 30 days each) in the relevant Zero Coupon Calculation Period and the denominator will be 360) or (ii) Actual/360 (in which case the numerator will be equal to the actual number of days in the relevant Zero Coupon Calculation Period and the denominator will be 360) or (iii) Actual/365 (in which case the numerator will be equal to the actual number of days in the relevant Zero Coupon Calculation Period and the denominator will be 365) or (iii) "Actual/Actual (ICMA)", in which case the Day Count Fraction will be determined as set out in the definition of "Zero Coupon Actual/Actual (ICMA)" below.

For the purposes of this definition:

"Zero Coupon Actual/Actual (ICMA)" means:

- (A) where the number of days in the Zero Coupon Calculation Period is equal to or shorter than the Zero Coupon Determination Period during which the Zero Coupon Calculation Period ends, the number of days in such Zero Coupon Calculation Period divided by the product of (x) the number of days in such Zero Coupon Determination Period and (y) the number of Determination Dates (as specified in the applicable Issue Terms) that would occur in one calendar year; or
- (B) where the Zero Coupon Calculation Period is longer than the Zero Coupon Determination Period during which the Zero Coupon Calculation Period ends, the sum of:
- i) the number of days in such Zero Coupon Calculation Period falling in the Zero Coupon Determination Period in which the Zero Coupon Calculation Period begins divided by the product of (x) the number of days in such Zero Coupon Determination Period and (y) the number of Determination Dates that would occur in one calendar year; and
 - ii) the number of days in such Zero Coupon Calculation Period falling in the next Zero Coupon Determination Period divided by the product of (x) the number of days in such Zero Coupon Determination Period and (y) the number of Determination Dates that would occur in one calendar year.

"Zero Coupon Calculation Period" means the period from (and including) the Issue Date of the first Tranche of the Notes to (but excluding) the date fixed for redemption or (as the case may be) the date upon which such Note becomes due and repayable.

"Zero Coupon Determination Period" means each period from (and including) a Determination Date to (but excluding) the next Determination Date."

2. The name of the Swedish Notes Issuing and Paying Agent in the paragraph beginning with words "Swedish Notes will be issued pursuant to an issuer agreement with Euroclear Sweden AB..." on page 240 of the Rates Base Prospectus will be amended by deleting the words "Nordea Bank AB (publ)" on seventh line of the paragraph thereof and substituting the words "Citibank Europe Plc (Sweden Branch)" therefor.

SCHEDULE 3

The sub-section entitled "*Belgian Taxation*" on pages 197 to 199 of the Base Prospectus in Section E.8 of the Base Prospectus entitled "*Taxation of Notes*" will be amended as set out below:

"BELGIAN TAXATION

Set out below is a summary of certain Belgian tax consequences of acquiring, holding and selling Notes. This summary is not intended to be an exhaustive description of all relevant Belgian tax considerations and investors should consult their own tax advisors regarding such considerations in relation to their own particular circumstances. The description of certain taxes in the Kingdom of Belgium (**Belgium**) set out below is for general information only and does not purport to be comprehensive.

This summary is based on current legislation, published case law and other published guidelines and regulations as in force at the date of this document and remains subject to any future amendments, which may or may not have retroactive effect.

Belgian income tax

Under Belgian tax law, "interest" income includes: (i) periodic interest income, (ii) any amount paid by or on behalf of the Issuer in excess of the issue price (whether or not on the maturity date), and (iii) if the Notes qualify as "fixed income securities" (within the meaning of article 2, §1, 8° of the Belgian Income Tax Code 1992), the interest accrued during the holding period in the case of a disposal of the Notes between two interest payment dates to any third party, excluding the Issuer. In general, notes are qualified as fixed income securities if there is a causal link between the amount of interest income and the holding period of the notes, on the basis of which it is possible to calculate the amount of pro rata interest income at the moment of the disposal of the notes during their lifetime.

Belgian resident individuals

For individuals subject to the Belgian personal income tax (*Personenbelasting/Impôt des personnes physiques*), and who are not holding Notes as a professional investment, all interest payments (as defined in the Belgian Income Tax Code 1992) will be subject to the tax regime described below.

Interest income paid or attributed is subject to a 27 per cent. withholding tax rate.

The Belgian withholding tax levied on interest income constitutes the final tax on the income received. As a consequence, interest income that has already been subject to Belgian withholding tax (e.g. through involvement of a Belgian financial intermediary) does not have to be declared in the individual's Belgian personal income tax return. It should be noted however that in specific cases, it may be beneficial to individuals to opt to 'globalise' the interest income with other types of income by declaring the interest income in their personal income tax return, thereby subjecting the interest income to the progressive tax rates (instead of the fixed 27 per cent. withholding tax rate). Individuals will normally only do so when application of the progressive tax rates is more advantageous than the application of the fixed 27 per cent. withholding tax rate. In such case the taxpayer can opt to declare the interest income in his personal income tax return in order to benefit from the more advantageous regime (article 171 of the Belgian Income Tax Code 1992).

On the other hand, if interest is collected outside Belgium (i.e. without involving a Belgian financial intermediary), the taxpayer must declare that interest in his/her personal income tax return. Such interest will be taxed separately at a rate of 27 per cent. (or at the relevant progressive personal income tax rate(s), taking into account the taxpayer's other declared income, whichever is more beneficial) and no local surcharges will be due.

Any capital gain upon a sale of Notes to a person other than the Issuer, provided it is not allocated to the professional activity of the individual, is in principle tax exempt (unless the tax authorities can prove that the capital gain is deemed to be speculative or outside the scope of the normal management of the individual's private estate, in which case the capital gains will be taxed at a fixed rate of 33 per cent. to be increased with municipal taxes). However, the interest accrued at the moment of the sale is taxable as interest income. This amount is determined on a pro rata basis. Capital losses upon a sale of

Notes are in principle not deductible if the Notes are not allocated to the professional activity of the individual.

Belgian companies

Interest paid through a financial intermediary established in Belgium to a Belgian company subject to the Belgian corporate income tax (*Vennootschapsbelasting/Impôt des sociétés*) will generally be subject to Belgian withholding tax currently at a rate of 27 per cent. However, an exemption may apply provided that certain formalities are complied with. For zero or capitalisation bonds, an exemption will only apply if the Belgian company and the Issuer are associated companies within the meaning of article 105, 6° of the Royal Decree of 27 August 1993 implementing the Belgian Income Tax Code of 1992.

For Belgian companies, the withholding tax is not the final tax as they also need to declare the interest income in their corporate income tax return, where it is taxed at the standard corporate income tax rate of currently 33.99 per cent (although reduced rates may apply to small companies if certain conditions are met).

If the income has been subject to a foreign withholding tax, a foreign tax credit will be applied on the Belgian tax due. For interest income, the foreign tax credit is generally equal to a fraction where the numerator is equal to the foreign tax and the denominator is equal to 100 minus the rate of the foreign tax, up to a maximum of 15/85 of the net amount received (subject to some further limitations).

Belgian companies are, under certain circumstances, entitled to credit Belgian withholding tax against their corporate income tax liability provided certain conditions are fulfilled. Any excess withholding tax is generally refundable.

For any Belgian company subject to Belgian corporate income tax, all interest and any gain on a sale of the Notes will form part of that company's taxable income. Losses on Notes are, in principle, tax deductible.

Other Belgian legal entities subject to the legal entities income tax

For other Belgian legal entities subject to the legal entities income tax (*Rechtspersonenbelasting/impôt des personnes morales*), all interest payments (as defined by the Belgian Income Tax Code 1992) will be subject to withholding tax, currently at a rate of 27 per cent., unless an exemption applies.

If interest is paid through a Belgian financial intermediary, such intermediary must levy withholding tax, currently at a rate of 27 per cent. This withholding tax is in principle a final tax. If no Belgian intermediary is involved, the interest must be declared and the applicable withholding tax must be paid by the legal entity itself.

Any capital gain on a sale of Notes to a party other than the relevant Issuer or the CGMFL Guarantor will, in principle, be tax exempt. However, the interest accrued at the moment of such transaction will be taxed as movable income in the hands of the seller. The interest accrued (but not yet paid) at the moment of sale is deemed to have been received by the seller (even though this interest has not yet been paid). Such interest is in principle subject to withholding tax at the rate of 27 per cent. This withholding tax must be paid by the legal entity itself.

Capital losses on Notes are (subject to certain exceptions) not tax deductible.

Tax on stock exchange transactions

The acquisition of Notes upon their issuance is not subject to the tax on stock exchange transactions (primary market transaction) (*Taks op de beursverrichtingen/Taxe sur les opérations de bourse*).

The sale and acquisition of Notes on the secondary market is subject to a tax on stock exchange transactions if executed in Belgium through a professional intermediary. The tax is generally due at a rate of 0.09 per cent. on each sale and acquisition separately, with a maximum of EUR650.00 per taxable transaction per party. The tax is due separately by each party to any such transaction, i.e. the seller (transferor) and the purchaser (transferee), both collected by the professional intermediary.

However, the tax referred to above will not be payable if no professional intermediary intervenes in the transaction or, even if a professional intermediary intervenes in the transaction, by exempt persons acting for their own account, including investors who are Belgian non-residents provided they deliver an affidavit to the financial intermediary in Belgium confirming their non-resident status and certain Belgian institutional investors, as defined in Article 126/1, 2° of the Code of various duties and taxes.

As stated below, the European Commission has proposed a Directive for a FTT. The proposed Directive currently stipulates that once the FTT enters into force, the participating Member States shall not maintain or introduce taxes on financial transactions other than the FTT (or VAT as provided in the Council Directive 2006/112/EC of November 28, 2006 on the common system of value added tax). For Belgium, the tax on stock exchange transactions should thus be abolished once the FTT enters into force. The proposal is still subject to negotiation between the participating Member States and therefore may be changed at any time. However, Estonia has announced its intention to not implement the FTT."
