What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to fulfil its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- The COVID-19 pandemic has had, and will likely continue to have, negative impacts on the Group's businesses, revenues, expenses, credit costs and overall results of operations and financial condition which could be material. Any such negative impact on the Group (including the Issuer), could adversely affect the ability of the Issuer to fulfil its obligations under the Securities, and consequently the value of and return on the Securities may also be adversely affected.

Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Guarantor on its audited historical financial information.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased centralisation of trading activities, the Guarantor could experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor may also be affected by macroeconomic, geopolitical and other challenges, uncertainties and volatilities, which may negatively impact the businesses of the Guarantor

and its ability to fulfil its obligations under the Securities, and the value of and return on the Securities.

- The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- The COVID-19 pandemic has had, and will likely continue to have, negative impacts on the Group's businesses, revenues, expenses, credit costs and overall results of operations and financial condition which could be material. Any such negative impact on the Group (including the Guarantor), could adversely affect the ability of the Guarantor to fulfil its obligations under the Securities, and consequently the value of and return on the Securities may also be adversely affected.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

- You should be prepared to sustain a total or partial loss of the purchase price of your Securities. If, at maturity, a Termination Barrier Event has occurred and the Final Reference Level of the Final Performance Underlying is less than its Termination Initial Level, the Securities will be terminated for less than your initial investment or even zero. Further, you may receive no coupon if a Coupon Barrier Event does not occur.
- The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective entity and of no other person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer and Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.
- Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If a market does develop, it may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be substantially less than the original purchase price. Illiquidity may have a severely adverse effect on the market value of Securities.
- Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of shares. The value of a share may go down as well as up and the value of a share on any date may not reflect its performance in any prior period. The value and price volatility of a share, may affect the value of and return on the Securities.
- The Securities do not create an actual interest in, or ownership of, an Underlying and accordingly you will not have voting rights or rights to receive dividends or distributions or any other rights with respect to an Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your investment, you will not have recourse under any relevant Security to an Underlying in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product.
- The terms and conditions of Securities include provisions dealing with the postponement of dates on which the price of an Underlying is scheduled to be taken. Such postponement or alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or an Underlying and/or hedging arrangements, or may replace an Underlying with a new share. Any such adjustments may have an adverse effect on the value of such Securities. In certain circumstances (for example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early terminated. If the Securities are terminated early, the amount paid may be less than your initial investment and you may therefore sustain a loss.
- Investment in the Securities involves the risk that if market interest rates subsequently increase above the rate paid on Securities, this will adversely affect the value of the Securities.
- Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date at the relevant Mandatory Early Termination Amount and no further amount shall be payable in respect of the Securities after the Mandatory Early Termination Date. In this case, you are subject to a reinvestment risk, as you may not be able to replace your investment in the Securities with an investment that has a similar profile of chances and risks as the Securities.
