$$\frac{\text{final reference level} - \text{redemption strike level}}{\text{redemption initial level}}$$

The **redemption strike level** for a redemption underlying is the redemption initial level of such redemption underlying

SECTION D – RISKS

Element	Title	
D.2	Key risks regarding the Issuers	<p>There are certain factors that may affect CGMFL's ability to fulfil its obligations under any Securities issued by it and CGML's ability to fulfil its obligations as guarantor in respect of Securities issued by CGMFL including that such ability is dependent on the earnings of Citigroup Inc.'s subsidiaries, that Citigroup Inc. may be required to apply its available funds to support the financial position of its banking subsidiaries, rather than fulfil its obligations under the Securities, that Citigroup Inc.'s business may be affected by economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.</p> <p>There are certain factors that may affect CGMFL's ability to fulfil its obligations under the Securities issued by it, including that such ability is dependent on the group entities to which it on-lends and funds raised through the issue of the Securities performing their obligations in respect of such funding in a timely manner. In addition, such ability and CGML's ability to fulfil its obligations as guarantor in respect of Securities issued by CGMFL is dependent on economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.</p>
D.3	Key risks regarding the Securities	<p>Investors should note that the Securities (including Securities that are expressed to redeem at par or above) are subject to the credit risk of CGMFL and CGML. Furthermore, the Securities may be sold, redeemed or repaid early, and if so, the price for which a Security may be sold, redeemed or repaid early may be less than the investor's initial investment. There are certain other factors which are material for the purpose of assessing the risks associated with investing in any issue of Securities, which include, without limitation, (i) risk of disruption to valuations, (ii) adjustment to the conditions, substitution of the relevant underlying(s) and/or early redemption following an adjustment event or an illegality, (iii) cancellation or scaling back of public offers or the issue date being deferred, (iv) conflicts of interest between the Issuer and/or any of its affiliates and holders of Securities, (v) modification of the terms and conditions of Securities by majority votes binding all holders, (vi) discretions of the Issuer and Calculation Agent being exercised in a manner that affects the value of the Securities or results in early redemption, (vii) change in law, (viii) payments being subject to withholding or other taxes, (ix) fees and commissions not being taken into account when determining secondary market prices of Securities, (x) there being no secondary market, (xi) market value of Securities being affected by various factors independent of the creditworthiness of CGMFL and CGML such as market conditions, interest and exchange rates and macro-economic and political conditions and (xii) credit ratings not reflecting all risks.</p> <p>See also Element D.6 below</p>
D.6	Key risks regarding the	<p>INVESTORS MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT AS THE CASE MAY BE. CGMFL DOES NOT REPRESENT THAT THE LIST BELOW IS COMPREHENSIVE. PROSPECTIVE INVESTORS SHOULD</p>

	<p>Securities and risk warning</p>	<p>READ THE BASE PROSPECTUS IN ITS ENTIRETY AND FORM THEIR OWN CONCLUSIONS REGARDING CGMFL.</p> <p>An investment in Securities may entail significant risks and risks that are not associated with an investment in a debt instrument with a fixed principal amount and which bears interest at either a fixed rate or at a floating rate determined by reference to published interest rate references. The risks of a particular Security will depend on the terms of such Security, but may include, without limitation, the possibility of significant changes in the prices of the relevant Underlying(s). Such risks generally depend on factors over which none of the relevant Issuer and, where the relevant Issuer is CGMHI, the CGMHI Guarantor or where the relevant Issuer is CGMFL, the CGMFL Guarantor, has control and which cannot readily be foreseen, such as economic and political events and the supply of and demand for the relevant Underlying(s). In recent years, currency exchange rates and prices for various Underlying(s) have been highly volatile, and such volatility may be expected in the future. Fluctuations in any such rates or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of any Security. The risk of loss as a result of the linkage to the relevant Underlying(s) can be substantial. Investors should note that their investment in Securities, may expose them to payments and/or deliveries which is/are determined by reference to one or more values of security indices, inflation indices, commodity indices, commodities, shares, depositary receipts, exchange traded funds, mutual funds, currencies, warrants, proprietary indices (which may be linked or referenced to one or more asset classes), dividend futures contracts, interest rates, the credit of one or more specified entities or other bases of reference of formulae (the Underlying(s)), either directly or inversely, and for physically settled Securities this may result in the Securities being redeemable for certain assets.</p>
