Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Issuer on its audited historical financial information.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to fulfil its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- If the relevant resolution authority is satisfied that the Issuer is failing or likely to fail, and subject to certain other conditions being satisfied, the Issuer may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Issuer (such as the Securities) and the conversion of unsecured debt claims (such as the Securities) to other instruments (e.g. equity shares), the transfer of all or part of the Issuer's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment in the Securities.

Status of the Securities: The Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer and will at all times rank *pari passu* and rateably among themselves and at least *pari passu* with all other unsecured and unsubordinated outstanding obligations of the Issuer, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application.

Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Guarantor on its audited historical financial information.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased centralisation of trading activities, the Guarantor could experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor may be affected by macroeconomic, geopolitical and other challenges, uncertainties and volatilities, including the global COVID-19 pandemic which may negatively impact the businesses of the Guarantor and its ability to fulfil its

obligations under the Securities, and the value of and return on the Securities.

- The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured debt claims (such as the under the deed of guarantee) to other instruments (e.g. equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment in the Securities.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

- The Securities may be traded in the secondary market (if any), and if so, the price for which a Security may be sold may be less than the principal amount of such Security and/or your initial investment in such Securities. You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The value of Securities prior to their scheduled redemption may vary due to a number of interrelated factors, including the value and volatility of the Underlying(s) and any changes in interim interest rates and dividend yields if applicable, and a sale of Securities prior to their scheduled redemption may be at a substantial discount from the original purchase price and you may lose some or all of your investment. If, at maturity, a Termination Barrier Event has occurred and the Final Reference Level of the Final Performance Underlying is less than its Termination Initial Level, the Securities may be terminated for less than your initial investment or even zero. Further, you may receive no coupon if a Coupon Barrier Event does not occur.
- The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective entity and of no other person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer and Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.
- Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If a market does develop, it may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be substantially less than the original purchase price. Illiquidity may have a severely adverse effect on the market value of Securities.
- Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of security indices. Global economic, financial and political developments, among other things, may have a material effect on the value of the component securities of, and/or the performance of, the Underlying(s), and in recent years, currency exchange rates and prices for component securities have been highly volatile. This may in turn affect the value of and return on the Securities. Where the Underlying(s) has a decrement feature, the return on such Underlying(s) will be calculated by reinvesting net dividends or gross dividends (depending on the type and rules of such Underlying(s)) paid by its components and by subtracting on a daily basis a pre-defined amount, and this may result in a lower return than that of a traditional "price return" or "total return" index, or a direct investment in the components of the Underlying(s). As the deduction of such pre-defined amount is defined as a fixed number of index points rather than as a percentage of the index level of the Underlying(s), such fixed deduction will have a greater negative impact on the index level of the Underlying(s) in a falling equities market.
- The Securities do not create an actual interest in, or ownership of, an Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your investment, you will not have recourse under any relevant Security to an Underlying or other items which may comprise the Underlying(s) in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product.
- Where (i) a benchmark is materially changed, cancelled or its use is prohibited, (ii) any authorisation or similar in respect of a benchmark or its administrator or sponsor has not been, or will not be, obtained or has been, or will be, rejected or similar such that the Issuer or any other entity is not, or will not be, permitted to use the benchmark, (iii) it is not commercially reasonable to continue use of a benchmark due to licensing restrictions or changes in licence costs, or (iv) a supervisor and/or sponsor officially announces a benchmark is no longer representative, or as of a specified future date will no longer be representative, of any relevant underlying market(s) or economic reality that such benchmark is intended to measure, adjustments may be made to the Securities which may include selecting one or more successor benchmarks and making related adjustments. Alternatively, early redemption of the Securities may apply. Any such adjustment may have an adverse effect on the value of, return on or market for the Securities, and if the Securities are early redeemed, the amount repaid to you could be substantially less than your initial investment and you could therefore sustain a loss.
- The terms and conditions of Securities include provisions dealing with the postponement of dates on which the level of an Underlying is scheduled to be taken. Such postponement or alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or an Underlying and/or hedging arrangements, or may replace an Underlying with a new security index. Any such adjustments may have an adverse effect on the value of such Securities. In certain circumstances (for example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early terminated. If the Securities are terminated early, the amount paid may be less than your initial investment and you may therefore sustain a loss.
- Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date at the relevant Mandatory Early Termination Amount and no further amount shall be payable in respect of the Securities after the Mandatory Early Termination

Date. In this case, you are subject to a reinvestment risk, as you may not be able to replace your investment in the Securities with an investment that has a similar profile of chances and risks as the Securities.
