What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its obligations under the Securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. The Issuer does not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate, the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financings, which there are no explicit triggers.
- The COVID-19 pandemic has had, and will likely continue to have, negative impacts on the Group's businesses, revenues, expenses, credit costs and other factors, which could be material. Any such negative impact on the Group (including the Issuer), could adversely affect the ability of the Issuer to service its obligations and consequently the value of and return on the Securities may also be adversely affected.

What are the key risks that are specific to the Securities?
<p>The Securities are subject to the following key risks:</p> <ul style="list-style-type: none"> You should be prepared to sustain a total or partial loss of the purchase price of your Securities. If, at maturity, a Termination Barrier Event has occurred and the Final Performance Underlying is less than its Termination Initial Level, the Securities may be terminated for less than your initial investment or even less than the purchase price if a Coupon Barrier Event does not occur. The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of the Issuer and the Guarantor, respectively, to the person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to the assets of the Issuer or the Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, liquidation or reorganization of the Issuer or the Guarantor. Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. The Securities may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment, and you may receive substantially less than the original purchase price. Illiquidity may have a severely adverse effect on the market value of Securities. Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of shares. The value of a share may fluctuate and the value of a share on any date may not reflect its performance in any prior period. The value and price volatility of a share, may affect the value of and return on the Securities. The Securities do not create an actual interest in, or ownership of, an Underlying and accordingly you will not have voting rights or rights to receive dividends or other distributions with respect to an Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of a Security is less than the amount paid on redemption of an investment, you will not have recourse under any relevant Security to an Underlying in respect of such Securities. You will have no legal or beneficial interest in the Underlying and will receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product. The terms and conditions of Securities include provisions dealing with the postponement of dates on which the price of an Underlying is scheduled to be paid, and alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities. The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Underlying, such as hedging arrangements, or may replace an Underlying with a new share. Any such adjustments may have an adverse effect on the value of such Securities. For example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default of the Underlying (including the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early terminated. If the Securities are terminated, you may receive less than your initial investment and you may therefore sustain a loss. Investment in the Securities involves the risk that if market interest rates subsequently increase above the rate paid on Securities, this will adversely affect the value of the Securities. Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date. The Mandatory Early Termination Amount and no further amount shall be payable in respect of the Securities after the Mandatory Early Termination Date. In this event, you may not be able to replace your investment in the Securities with an investment that has a similar profile of chances and risks as the Securities.
