### What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to pay under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner. Any failure by CGML to perform its obligations could negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the Issuer's ability to raise funds may be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements.
- If the relevant resolution authority is satisfied that the Issuer is failing or likely to fail, and subject to certain other conditions being satisfied, the Issuer may be subject to a resolution process, including potentially the write down of claims of unsecured creditors of the Issuer (such as the Securities) and the conversion of unsecured debt claims (such as the Securities) into shares of the Issuer or the transfer of all or part of the Issuer's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment.

**Qualifications in audit report on historical financial information:** There are no qualifications in the audit report of the Guarantor on its audited historical financial information.

**Key risks in respect of the Guarantor:** The Guarantor is subject to the following key risks:

- The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased central bank intervention, the Guarantor may experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. Such losses could impact the Guarantor's ability to meet its obligations under the Securities, and the value of and return on the Securities.
- The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the Guarantor and its affiliates are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements.
- If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to a resolution process, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured claims (such as under the deed of guarantee) to other instruments (e.g. equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of such measures, the Guarantor's ability to meet its obligations under the Securities, and the value of and return on the Securities, may be adversely affected.

| <b>What are the key risks that are specific to the Securities?</b>   |
| <p>The Securities are subject to the following key risks:</p> <ul style="list-style-type: none"> <li>You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The Securities may be traded in the secondary market (if any), and may be less than the principal amount of such Security and/or your initial investment in such Securities. If, at maturity, a Termination Barrier Event has occurred and the Performance Underlying is less than its Termination Initial Level, the Securities may be terminated for less than your initial investment or even zero. Further, you may not receive any amount if the Termination Barrier Event does not occur.</li> <li>The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respectively. Payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer or the Guarantor if the Issuer or the Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.</li> <li>Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If there is no established trading market, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be less than your initial investment. Illiquidity may have a severely adverse effect on the market value of Securities.</li> <li>Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of shares. The value of a share may go down as well as up and may not reflect its performance in any prior period. The value and price volatility of a share, may affect the value of and return on the Securities.</li> <li>The Securities do not create an actual interest in, or ownership of, an Underlying and accordingly you will not have voting rights or rights to receive dividends or other distributions of the Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your initial investment in the relevant Security to an Underlying in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than if you had invested directly in an Underlying or through another product.</li> <li>The terms and conditions of Securities include provisions dealing with the postponement of dates on which the price of an Underlying is scheduled to be taken. Any such postponement or valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.</li> <li>The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or the Underlying. The calculation agent may replace an Underlying with a new share. Any such adjustments may have an adverse effect on the value of such Securities. In certain circumstances (for example, if the calculation, adjustment or substitution can reasonably be made, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements or the illegality), the Securities may be early terminated. If the Securities are terminated early, the amount paid may be less than your initial investment and you may therefore not receive your initial investment.</li> <li>Investment in the Securities involves the risk that if market interest rates subsequently increase above the rate paid on Securities, this will adversely affect the value of the Securities.</li> <li>Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date at which time no further amount shall be payable in respect of the Securities after the Mandatory Early Termination Date. In this case, you are subject to a reinvestment risk, as you will have to reinvest the amount paid in the Securities with an investment that has a similar profile of chances and risks as the Securities.</li> </ul> |
