What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to meet its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner. Any failure by CGML to do so could negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the Issuer's ability to raise financing may be negatively affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements.

Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Guarantor on its audited historical financial information.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased central bank intervention, the Guarantor may experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor is also exposed to geopolitical and other challenges, uncertainties and volatilities, including the global COVID-19 pandemic, which may negatively impact the businesses of the Guarantor and the value of and return on the Securities.
- The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the Guarantor and its affiliates are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements.
- If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to a resolution authority, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured claims into equity (such as equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of such measures, the value of and return on the Securities may be adversely affected.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

- You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The value of Securities prior to their scheduled redemption may vary from the value, dividend yield and volatility of the Underlying(s) and any changes in interim interest rates if applicable, and a sale of Securities prior to their scheduled term may result in a loss of the original purchase price and you may lose some or all of your investment. If, at maturity, a Termination Barrier Event has occurred and the Final Reference Level of the Underlying(s) is below the Termination Initial Level, the Securities may be terminated for less than your initial investment or even zero. Further, you may receive no coupon if a Coupon Barrier Event occurs.
- The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective party. The payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer or the Guarantor if the Issuer or the Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.
- Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If there is no established trading market for the relevant Security to an Underlying in respect of such Securities, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be lower than your initial investment. Illiquidity may have a severely adverse effect on the market value of Securities.
- Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of shares. The value of a share may go down as well as up and may not reflect its performance in any prior period. The value and price volatility of a share, may affect the value of and return on the Securities.
- The Securities do not create an actual interest in, or ownership of, an Underlying and accordingly you will not have voting rights or rights to receive dividends or distributions of the Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your initial investment, you will not have a claim against the Underlying. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than if you had invested directly in an Underlying or through another product.
- The terms and conditions of Securities include provisions dealing with the postponement of dates on which the price of an Underlying is scheduled to be taken. Such postponement of valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or the Underlying. Such adjustments may replace an Underlying with a new share. Any such adjustments may have an adverse effect on the value of such Securities.
- In certain circumstances (for example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default or a suspension of trading of the Underlying), the calculation agent may substitute a new share for the Underlying. Any such substitution may have an adverse effect on the value of such Securities.

Underlying or the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early terminated. If the Securities are terminated, you will receive the initial investment and you may therefore sustain a loss.

- Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date at the Issuer's option and no further amount shall be payable in respect of the Securities after the Mandatory Early Termination Date. In this case, you are subject to a reinvestment risk, as you will be required to reinvest in the Securities with an investment that has a similar profile of chances and risks as the Securities.
